

## Corporate Subscription

With the Corporate Subscription, you get a corporate account and then you can create as many Training Groups as you wish for your company. Each Training Group can have its own local Training Group administrator. This option is good for companies that have different sites or divisions that have different training needs and/or separate budgets.

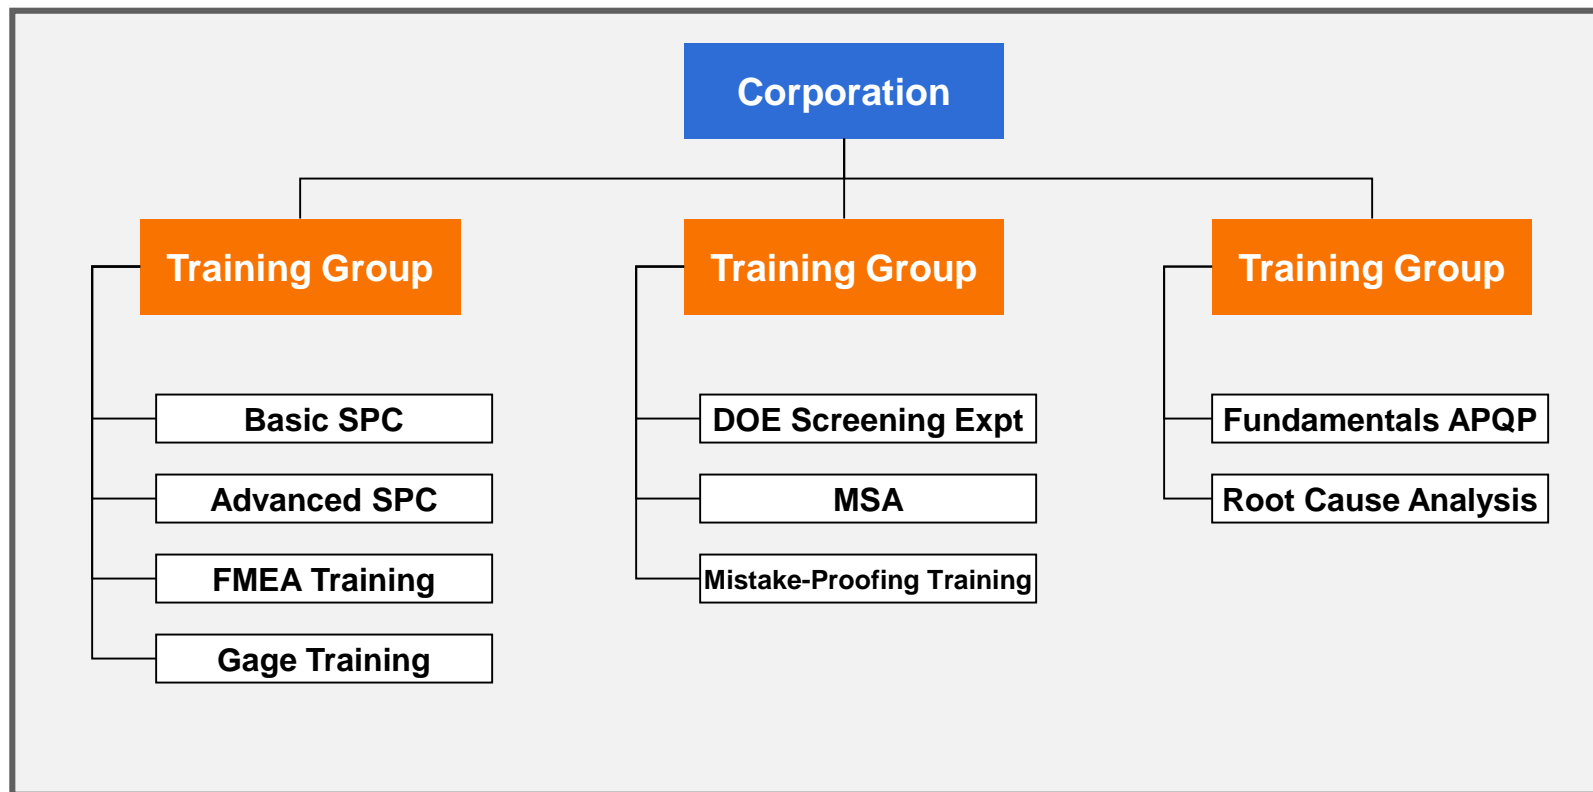

## Workgroup Subscriptions

With a Small Workgroup Subscription, you get one Training Group account with an administrator. With a Large Workgroup Subscription you get two Training Group accounts. Each Training Group can have its own local Training Group administrator.

## Courses Available

With all subscriptions, you get access to all of our courses including a large number of ½ credit Targeted Training and Overview Courses. If you have more than one Training Group, you can also make different courses available to different Training Groups.

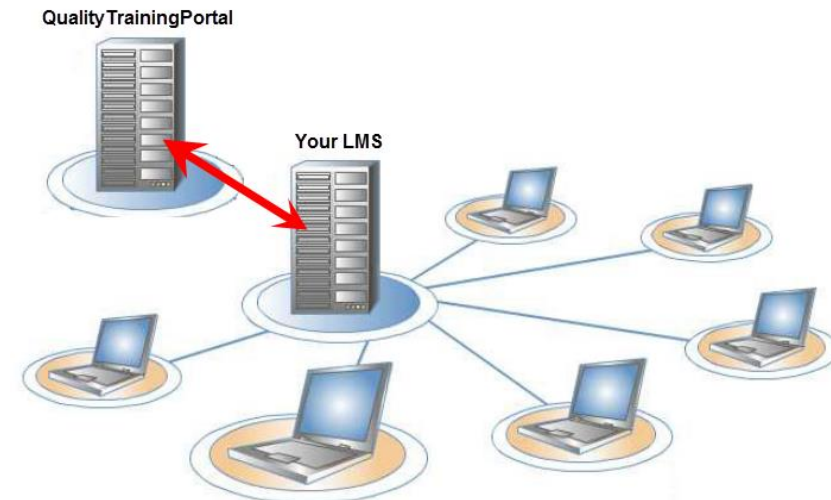

## Registration Options

For Large Workgroup customers who initially purchase at least 100 credits or Corporate subscribers, we offer several options that make registration and learning management easier.

### Self-Registration

### LMS to LMS via SCORM, AICC or custom connection

### Upload from a Spreadsheet

Minimum of 25 learners per upload
